

XpertID App

In a world where time is valuable and security is a priority, the XpertID App brings the solution to the identification process outside the office for notaries and attorneys as well as their clients. Meet an identification process that is not only quick and easy, but also ensures the integrity and accuracy essential to your role as notary and gatekeeper.

XpertID App: Discover the benefits

On-the-Go Convenience: With the smartphone app (available for Android and iOS), you can now easily verify ID documents wherever you are.

Seamless Synchronization: The scanned data is automatically processed in NEXAssyst exactly as you are used to in the office with Restport technologies' WID scanner.

Privacy Guaranteed: We respect the privacy of your office and your clients. All scanned data remains within your office and is NOT shared with third parties.

Global Compatibility: The app allows you to verify ID documents from around the world.

Verify with Confidence: The app's integrated reference document database enables you to accurately verify ID documents based on their authenticity features.
